# THE TELSTRA GATEWAY MAX AT A GLANCE

# 01 SET UP YOUR TELSTRA GATEWAY MAX

**Important:** Before starting to set up your gateway, ensure that you have received your order completion email. For the best Wi-Fi coverage, place your Telstra GatewayMax with the stand provided, in a location that is central to where you will use your Wi-Fi devices.

## Step 1: Connecting the cables

Your Telstra Gateway Max connects to your existing telephone socket. Before you connect your Telstra Gateway Max, you will need to disconnect your telephone by unplugging it from the wall socket.

1. Connect the filter to the wall socket.
2. Connect your telephone to the filter, to the port labelled 'LOCAL PHONE'.
3. Connect the other end of the ADSL modem cable to the grey DSL port on the back of the Telstra Gateway Max.

## Step 2: Powering on

1. Connect one end of the power cable to the gateway and the other end to a power outlet.
2. Turn on your Telstra Gateway Max.
3. Allow up to 3 minutes for start-up. The LED lights on the front of the Telstra GatewayMax will flash.
4. Check that the Status LED light is solid green before proceeding.

# 02 CONNECT YOUR COMPUTER / DEVICES

Your Telstra Gateway Max allows you to connect your devices to the internet, through a Wi-Fi network connection and Ethernet network connection. **You may choose to connect via one method only.**

## Connecting via Wi-Fi

The Network Name and Key can be found on the Wi-Fi security card provided, and on the bottom of your Telstra Gateway Max.

1. Enable Wi-Fi connection on your computer/device.
2. Select the Network Name from the list, or enter the Network Name if you do not see it on the list.
3. Enter the Network Key when prompted.

OR

## Connecting via Ethernet

1. Connect one of the Ethernet cables to the yellow LAN port on the back of your Telstra Gateway Max.
2. Connect the other end of the Ethernet cable to an Ethernet port on your computer.
3. Check that the Ethernet LED is green before proceeding.

If you can see the 5G network in your list, select this for faster performance.

# 03 ACTIVATE AND CHECK YOUR INTERNET CONNECTION

Before you can activate your Internet connection please, ensure you have received your order completion email. Have your Telstra broadband username and password handy and follow these steps:

1. Open your preferred web browser on your computer/device
2. Go to [telstra.gateway/](http://telstra.gateway/)
3. Click on 'Broadband'
4. Check in the username field, under PPPoE Settings, that your Telstra username is present
5. Is your Telstra username present?  
If YES, please go to [www.telstra.com/welcome](http://www.telstra.com/welcome)  
If NO, please continue with **Step 6**
6. Enter your Telstra Broadband username and password

### If you can't remember your Telstra broadband password

Use an internet-enabled device such as your phone go to [www.telstra.com/password](http://www.telstra.com/password) to retrieve your password."

7. Click on 'Save'
8. In your browser, go to [www.telstra.com/welcome](http://www.telstra.com/welcome)

# 04 TROUBLESHOOTING TIPS

## Connecting to your Gateway

If you are having trouble connecting to your Gateway, make sure that:

- The cabling is connected correctly, as shown in Part 1 Set Up Your Telstra Gateway.
- The power supply is connected.

If you still have trouble, try restarting your Gateway and computer/device by turning them off. Wait 10 seconds, before turning them on again.

## Can't find your Telstra Broadband password?

On an internet-enabled device, such as your phone, go to [www.telstra.com.au/password](http://www.telstra.com.au/password) to retrieve your password.

## Can't get onto the Internet?

Gateway LEDs affected	Gateway LED status combination	Suggested Actions
WAN + Internet	OFF + Red	- Check you have received your order completion email, before continuing the set up of your service
WAN + Internet	Green + Green	- Check you have received your order completion email, and follow <b>Section 3</b> in this Quick Start Guide

# 05 MANAGING YOUR GATEWAY

## Using the Gateway Max Control Panel

Use the Gateway control panel to manage and customise your Gateway settings. The control panel can be accessed from any device connected to the Gateway. To access the Gateway control panel:

1. Open a web browser on your computer/device.
2. Enter the URL [telstra.mygateway/](http://telstra.mygateway/)

Useful control panel functions:

- Use Parental Control to protect children from inappropriate content, and restrict internet usage.
- Go to Wi-Fi to change your Wi-Fi network name and security key.
- Go to Broadband to change your Telstra Broadband username and password.
