Package Contents

- TEW-655BR3G
- CD-ROM (User's Guide)
- Multi-Language Quick Installation Guide
- Cat.5 Ethernet Cable (1.5m/ 6ft)
- Power Adapter (5V DC, 2.5A)
- Lithium Ion Battery (3.7V, 1700mAh)

System Requirements

- A computer with a wireless network adapter properly installed.
- Web Browser: Internet Explorer (6.0 or above)
- Broadband Internet or 3G Internet Service
- Cable/DSL Modem or 3G USB Adapter*
- TA-CC Car Charger (optional)

* For a list of compatible 3G USB Adapters, please go to <http://www.trendnet.com/products/TEW-655BR3G>.

Collect Internet Service Provider (ISP) Information

During the installation of your 150Mbps Mobile Wireless N Router, the Setup Wizard will automatically detect your ISP connection type. If the router cannot detect your ISP connection type, you can manually specify the connection type. Please verify your Internet connection type with your ISP and ensure you have all the information for one of the following connection types:

1. 3G (Auto Detection) connection

Pin Code (Optional): _____

2. 3G (Manual) connection

Country: _____

Telecom: _____

3G Network: _____

APN (Optional): _____

Pin Code (Optional): _____

Dialed Number: _____

Account (Optional): _____

Password (Optional): _____

3. iBurst connection

Account: _____

Password: _____

Primary DNS: _____

Secondary DNS: _____

Service Name (Optional): _____

Assigned IP Address (Optional): _____

4. Dynamic IP connection

HostName: _____

ISP registered Mac Address: _____

5. Static or Fixed IP connection

Static IP Address: _____ (e.g. 215.24.24.129)

Static Subnet Mask: _____

Static Gateway: _____

Static Primary DNS: _____

Static Secondary DNS: _____

6. PPPoE connection

Account : _____

Password: _____

Primary DNS: _____

Secondary DNS: _____

Service Name (Optional): _____

Assigned IP Address (Optional): _____

7. PPTP connection

IP Mode: Dynamic IP Address or Static IP Address

My IP Address: _____ (e.g. 215.24.24.129)

My Subnet Mask: _____

Gateway IP: _____

Service IP Address / Name: _____

PPTP Account: _____

PPTP Password: _____

8. L2TP connection

IP Mode: Dynamic IP Address or Static IP Address

IP Address: _____ (e.g. 215.24.24.129)

Subnet Mask: _____

WAN Gateway IP: _____

Service IP Address / Name: _____

L2TP Account: _____

L2TP Password: _____

2. Hardware Installation

1. Verify that you have an Internet connection when connecting the 3G USB adapter to your computer. Open your browser (e.g. Internet Explorer) and type in a URL (e.g. <http://www.trendnet.com>) in the address bar.

Note: You may need to activate your Internet connection. Please contact your ISP for more information.

2. Remove the battery lid. The battery lid is located on the bottom of the router.

3. Insert the battery into the router.

4. Secure the battery lid back into the router.

ENGLISH

FRANÇAIS

DEUTSCH

ESPAÑOL

РУССКИЙ

5. Connect one end of the provided RJ-45 cable to the TEW-655BR3G's Ethernet port. Connect the other end of the cable to the computer's Ethernet port.

6. Connect the AC Power Adapter to the wireless router and then to a power outlet.

7. If you are using the TEW-655BR3G for the first time, you will need to charge your battery for 8 hours.

8. Connect your 3G USB adapter to the USB port on the TEW-655BR3G.

9. Move the Power switch to the on position.

10. Verify that the following panel lights are on: Power, Wireless, Ethernet and 3G (USB).

3. Configure the TWE-655BR3G

Note:

1. Gather all information related to your Internet Connection before you start.
If necessary, contact your Internet Service Provider (ISP).
2. Below are steps for connecting to a 3G Internet connection. For instructions connecting to a Broadband Internet connection, please see question 5 in the Troubleshooting section.

1. Open your web browser, type **http://192.168.10.1** in the Address bar, and then press **Enter**.

2. Enter the System Password, and then click **Login**. By default:

System Password: **admin**

3. Select **Wizard** and then click **Enter**.

4. Click **Next**.

5. Enter the Old password (By default, the **Password is admin**), enter a **New Password**, reconfirm the **New Password** and then click **Next**.

6. Select your Time Zone and then click **Next**.

7. Select **Wireless WAN** for WAN Interface. Select 3G or iBurst (the example shown is for 3G). Then click **Next**. Configure the settings based on information provided by your ISP. Follow the wizard instructions to complete the configuration.
Note: Each WAN type may have different options.

8. Enter the desired **Network ID (SSID)** and then click **Next**.

Note:

1. To protect your network from any unauthorized access it is recommended to enable wireless encryption.
2. The example below is for WPA2-PSK security. If you select WPA-PSK or WPA2-PSK, make sure your wireless adapters support WPA or WPA2. If your wireless adapters do not support WPA or WPA2, then select WEP.

9. Select the desired **Authentication** mode, select the desired Encryption type and enter characters for your Pre-Shared key and then click **Next**. For WPA-PSK or WPA2-PSK, the Pre-Shared Key must be between 8 and 63 ASCII or 64 HEX characters. Make sure to copy down the Pre-Shared Key.

10. Check **Do you want to proceed with network testing?** and then click **Apply Settings**.

11. Wait around 43 seconds while the router reboots.

12. Wait around 15 seconds while the router tests the Internet connection.

13. Click **Finish**.

14. Connect your computer wirelessly to the TEW-655BR3G.

15. Open up your browser and enter in a URL (e.g. www.trendnet.com) to verify that you have Internet connection.

Your Configuration is now complete

For detailed information regarding the **TEW-655BR3G**'s configuration and advanced settings, please refer to the Troubleshooting section, User's Guide CD-ROM, or TRENDnet's website at <http://www.trendnet.com>.

1. I typed `http://192.168.10.1` in my Internet Browser's Address Bar, but an error message says "The page cannot be displayed." How can I get into the TEW-655BR3G's web configuration page?

1. Check your hardware settings again by following the instructions in Section 2.
2. Make sure the Ethernet and Wireless LEDs are lit.
3. Make sure your TCP/IP settings are set to **Obtain an IP address automatically** (see the steps below).
4. Press on the factory reset button for 15 seconds.

Windows 7

1. Go into the **Control Panel**, click **Network and Sharing Center**, click **Change Adapter Settings** and then right-click the **Local Area Connection** icon and then click **Properties**.

Obtain an IP address automatically

Use the following IP address:

IP address:
Subnet mask:
Default gateway:

2. Click **Internet Protocol Version 4 (TCP/IPv4)** and then click **Properties**. Then click on **Obtain an IP address automatically**.

Windows Vista

1. Go into the **Control Panel**, click **Network and Internet**, click **Network and Sharing Center**, click **Manage Network Connections** and then right-click the **Local Area Connection** icon and then click **Properties**.

Obtain an IP address automatically

Use the following IP address:

IP address:
Subnet mask:
Default gateway:

2. Click **Internet Protocol Version 4(TCP/IPv4)** and then click **Properties**. Then click on **Obtain an IP address automatically**.

Windows XP/2000

1. Go into the **Control Panel**, double-click the **Network Connections** icon and then right-click the **Local Area Connection** icon and then click **Properties**.

Obtain an IP address automatically

Use the following IP address:

IP address:
Subnet mask:
Default gateway:

2. Click **Internet Protocol (TCP/IP)** and then click **Properties**. Then click on **Obtain an IP address automatically**.

2. I am not sure what type of Internet Account Type I have for my Internet connection. How do I find out?

Contact your Internet Service Provider's (ISP) support service for the correct information.

3. I went through the Wizard, but I can not get onto the Internet. What should I do?

1. Verify that you can get onto the Internet by connecting your 3G USB adapter directly to your computer.
2. Contact your ISP and verify all the information that you have in regards to your Internet connection settings is correct.
3. Verify that the 3G USB adapter is firmly connected to the USB port on the TEW-655BR3G.
4. Power cycle the TEW-655BR3G. Move the power switch to the off position. Wait 30 seconds, then move the power switch back to the on position.

4. I cannot make a wireless connection to the Router. What should I do?

1. Double check that the wireless LED on the Router is lit.
2. Login to your router. Enter <http://192.168.10.1> into the address bar of your router. The default system password is admin. Click **Advanced** and then click **Wireless**. Make sure Enabled is selected and then click **Save**.
3. Power cycle the TEW-655BR3G. Move the power switch to the off position. Wait 30 seconds, then move the power back to the on position.
4. Contact the manufacturer of your wireless network adapter and make sure the wireless network adapter is configured with the proper SSID. The default SSID is TRENDnet655.

5. I am trying to connect to a Broadband connection instead of a 3G connection. What should I do?

1. Follow steps 1-6 in section 3 Configure the TEW-655BR3G.
2. Select Ethernet WAN for WAN Interface. Select the desired WAN type (the example shown is for Dynamic IP Address). Configure the settings based on information provided by your ISP. Follow the wizard instructions to complete the configuration. Note: Each WAN type may have different options.
3. Follow steps 8-9 in Connecting to a 3G Internet Connection section.
4. Select The Ethernet Port will be set as WAN Port after saving, confirm? and then click Apply settings.
5. Wait around 37 seconds while the router reboots.
6. Disconnect the Ethernet cable from your computer.
7. Connect one end of a RJ-45 cable to the TEW-655BR3G's Ethernet port. Connect the other end of the cable to your modem.
8. Connect your computer wirelessly to the TEW-655BR3G.
9. Open up your browser and enter in a URL (e.g. www.trendnet.com) to verify that you have Internet connection.

If you still encounter problems or have any questions regarding the **TEW-655BR3G**, please contact TRENDnet's Technical Support Department.

The following are some general wireless tips to help minimize the impact of interference within an environment.

Assign your network a unique SSID

Do not use anything that would be identifying like “Smith Family Network”. Choose something that you would easily identify when searching for available wireless networks.

Do not turn off the SSID broadcast

The SSID broadcast is intended to be on and turning it off can cause connectivity issues. The preferred method of securing a wireless network is to choose a strong form of encryption with a strong and varied encryption key.

Note: after setting up the SSID, encryption type and encryption key/passphrase, please make a note of them for future reference. You will need this information to connect your wireless computers to the wireless router/access point.

Change the channel

Most wireless access points and routers are defaulted to channel 6. If you have a site survey tool that will display the channels you can plan your channel selection around neighboring access points to minimize interference from them. If your site survey tool does not display the channel try using channels 1 or 11.

Change the channel bandwidth

If you are using an 802.11n router or access point you can also make the following changes. Change the channel bandwidth to 20/40MHz. This will provide the highest possible performance using an 802.11n device. Also, if using 802.11n you should be securing the network with WPA2 security.

Note: Due to Wi-Fi certification considerations if you choose WEP, WPA or WPA2-TKIP encryption this device may operate in legacy wireless mode (802.11b/g). You may not get 802.11n performance as these forms of encryption are not supported by the 802.11n specification.

Avoid stacking hardware on top of each other to prevent overheating issues

Maintain enough free space around the hardware for good ventilation and airflow. There should also be plenty of free space around the antennas to allow the wireless signal to propagate. Please also make sure that the wireless hardware is not placed in any type of shelving or enclosures.

There are a number of other environmental factors that can impact the range of wireless devices.

1. Adjust your wireless devices so that the signal is traveling in a straight path, rather than at an angle. The more material the signal has to pass through the more signal you will lose.

2. Keep the number of obstructions to a minimum. Each obstruction can reduce the range of a wireless device. Position the wireless devices in a manner that will minimize the amount of obstructions between them.
3. Building materials can have a large impact on your wireless signal. In an indoor environment, try to position the wireless devices so that the signal passes through less dense material such as dry wall. Dense materials like metal, solid wood, glass or even furniture may block or degrade the signal.
4. Antenna orientation can also have a large impact on your wireless signal. Use the wireless adapter's site survey tool to determine the best antenna orientation for your wireless devices.
5. Interference from devices that produce RF (radio frequency) noise can also impact your signal. Position your wireless devices away from anything that generates RF noise, such as microwaves, HAM radios, Walkie-Talkies and baby monitors.
6. Any device operating on the 2.4GHz frequency will cause interference. Devices such as 2.4GHz cordless phones or other wireless remotes operating on the 2.4GHz frequency can potentially drop the wireless signal. Although the phone may not be in use, the base can still transmit wireless signals. Move the phone's base station as far away as possible from your wireless devices.

If you are still experiencing low or no signal consider repositioning the wireless devices or installing additional access points. The use of higher gain antennas may also provide the necessary coverage depending on the environment.

Declaration of Conformity

Company Information:

Company Name:

TRENDnet, Inc.

Company Address:

20675 Manhattan Place

Torrance, CA 90501

USA

Product Information:

Product Description:

150Mbps Mobile Wireless N Router

Model Number:

TEW-655BR3G

Brand name:

TRENDnet

Technical Standards:

EN 300 328 V1.7.1: 10-2006

EN 301 489-1 V1.8.1: 04-2008

EN 301 489-17 V1.3.2: 04-2008

EN 60950-1 :2006

Declaration:

The product is herewith confirmed to comply with the requirements of Directive 1999/5/EC of the Council (European Parliament) on the radio and telecommunications terminal equipment and Energy-related products Directive 2009/125/EC.

I hereby declare that the products and devices mentioned above are consistent with the standards and provisions of the guidelines.

Certifications

This equipment has been tested and found to comply with FCC and CE Rules.

Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference.
- (2) This device must accept any interference received. Including interference that may cause undesired operation.

Waste electrical and electronic products must not be disposed of with household waste. Please recycle where facilities exist. Check with you Local Authority or Retailer for recycling advice.

NOTE: THE MANUFACTURER IS NOT RESPONSIBLE FOR ANY RADIO OR TV INTERFERENCE CAUSED BY UNAUTHORIZED MODIFICATIONS TO THIS EQUIPMENT. SUCH MODIFICATIONS COULD VOID THE USER'S AUTHORITY TO OPERATE THE EQUIPMENT.

ADVERTENCIA

En todos nuestros equipos se mencionan claramente las características del adaptador de alimentación necesario para su funcionamiento. El uso de un adaptador distinto al mencionado puede producir daños físicos y/o daños al equipo conectado. El adaptador de alimentación debe operar con voltaje y frecuencia de la energía eléctrica domiciliar existente en el país o zona de instalación.

Product Warranty Registration

Please take a moment to register your product online.
